Personal Statement

My name is Scott Brownlow, 22 years old and I am a recent graduate in Graphic Design. I have picked up a lot of skills over the years studying but overall, I have, as a person developed into a designer.

I find that Graphic Design is everywhere and it has become a huge part of my life. I love to design using the techniques and skills that I have learnt over the last three years and would love to continue developing my skills in the industry.
